

Part 2: Introduction to the Tools (Excel)

A. Introduction to Concept of Excel & Cell Definitions

- Navigating Excel
- Cell References — Relative vs. Absolute (\$A\$1 vs. A1) (*new*)
- Named Ranges (*new*)
- Working with Tables
- Formatting Data
- Managing Data with Tables
- Data Preparation in Excel
- Logical Functions

B. Excel Fundamentals

1. Lookup Functions
2. Core Formulas (*new*)
 - SUMIFS / COUNTIFS / AVERAGEIFS
 - Nested IF Statements
3. Text Functions (*new*)
 - TRIM, LEFT, RIGHT, MID
 - CONCATENATE / TEXTJOIN
4. Data Cleaning (*new*)
 - Removing Duplicates
 - Handling Blanks and Errors
5. Data Validation (*new*) — Dropdown Lists and Input Restrictions
6. Pivot Table
7. Logical Function
8. Conditional Formatting (*new*)
9. Getting Started with Data Visualization in Excel
10. Charts (*new*)
 - Common Chart Types and Combo Charts
 - Sparklines
11. Aggregated vs. Disaggregated Data
12. Exploratory Data Analysis (EDA)
 - Performing Exploratory Data Analysis
13. Summary Statistics
14. What-If Analysis & Goal Seek (*new*)
15. Forecasting in Excel
16. Dynamic Array Functions (*new*) — UNIQUE, FILTER, SORT
17. Introduction to Power Query in Excel
18. Fundamentals of Power Query

C. Working Efficiently in Excel (*new*)

19. Keyboard Shortcuts and Productivity Tips
