

Part 4: Data Analysis with Power BI

1. Introduction to Power BI
2. Navigating Power BI
3. Introduction to ETL Workflow
4. Introduction to Power Query
5. Data Preparation in Power Query
6. Navigating Power Query
7. Functions for Manipulating Data in Power BI
8. Fundamentals of Power Query

Data Modeling (*new*)

9. Introduction to Data Modeling
10. Fact Tables vs. Dimension Tables (*new*)
11. Star Schema (*new*)
12. Building Relationships Between Tables (*new*)
13. Cardinality and Cross-Filter Direction (*new*)

DAX

14. Introduction to DAX
15. Calculated Columns vs. Measures (*new*)
16. Common DAX Functions (*new*) — CALCULATE, SUM, related time-intelligence functions
17. Writing Basic DAX Measures (*new*)

Reports & Visualization

18. Building a Basic Report in Power BI
19. Introduction to Report Types
20. Dashboard Design Principles (*new*) — layout, color, chart choice
21. Visualizing Data in Power BI
22. Data Storytelling in Power BI

Publishing & Sharing (*new*)

23. Publishing Reports to Power BI Service
24. Setting Up Data Refresh Schedules
25. Dashboards vs. Reports — Sharing and Distribution
